**We handle your pouch**

[www.scaldopack.be](http://www.scaldopack.be)

# Our machines

While other companies supply and develop the machinery as well as the printed packaging material to their clients, Scaldopack has a completely different approach to the market. The machinery from Scaldopack is tailored to an earlier chosen pouch, spout and cap the customer wants to use.

## Smartfiller

Filling pre-made pouches through the spout and capping them. This smart filler is our introduction model for pilot/small production.

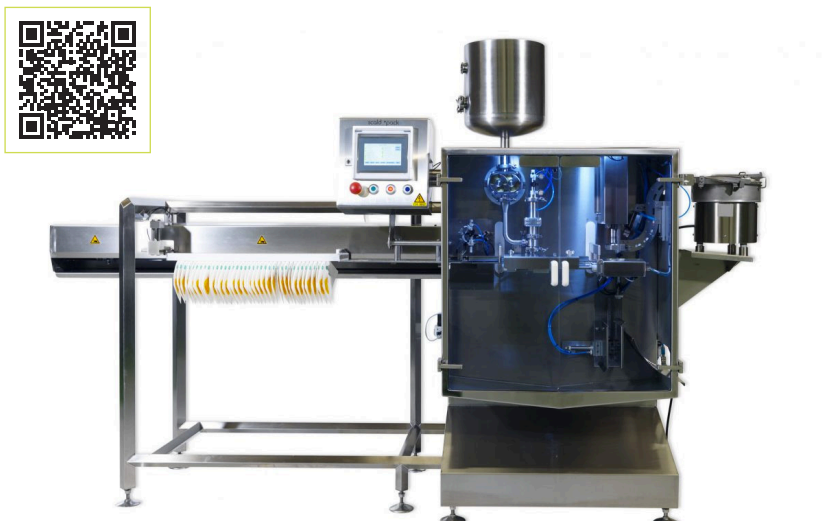

### Advantages

- For food and non-food applications
- Capability to treat all kinds of liquids and high viscous products, even with particles.
- Due to its simple manual loading, the machine is capable of filling several different spout and cap sizes and designs.
- The SMARTFILLER can be equipped with lobe, peristaltic or piston pumps.

## Monofiller Stepper

The Monofiller Stepper is an automatic filling and capping machine that fills up to 25-30 pouches per minute through the spout.

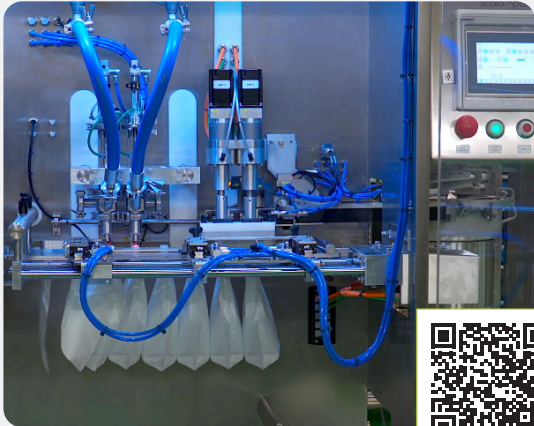

### Advantages

- 25-30 Packs per minute through the spout
- Food and non food applications
- Possibility to handle high viscous products and products with particles
- Fully accessible from the front easy handling
- Vertical capping
- All movements are servo controlled

## Monofiller Multihead 2

The Monofiller Multihead 2 is our premium machine that can fill up to 60 packs per minute through the spout. This machine is used in the food and non-food industry. It can handle high viscous products and products with particles.

### Advantages

- High quality fill through the spout filling
- Multi head
- 60 pouches per minute through the spout
- Food and non food applications
- Can handle high viscous products and products with particles
- Fully accessible from the front easy handling
- Vertical capping
- 230V only
- Fully front accessible
- All movements are servo controlled

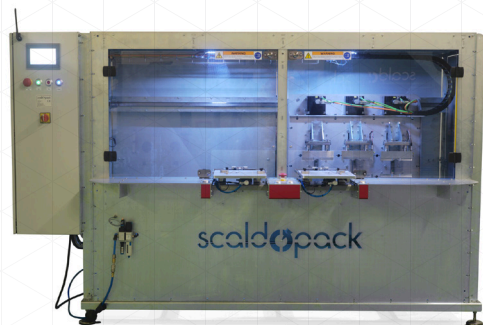

## Monofiller Multihead 4

The Monofiller Multihead 4 is our automatic pouch filling through the spout and capping machine. It can fill top and corner spouted pouches.

### Advantages

- High quality fill through the spout filling
- Multi head
- 120 Packs per minute through the spout
- Food and non food applications
- Can handle high viscous products and products with particles
- Fully accessible from the front easy handling
- Vertical capping
- 3 x 380 V
- Fully front accessible
- All movements are servo controlled

## SI-LAB – Spout Inserting Machine

We designed this machine to use in a rather laboratorial environment for small quantities, for research and development purposes.

### Advantages

- Easy to operate, flexible and highly reliable process, allowing customers to confidently supply spouted pouches.
- Perfect platform for spouted pouches new players, customers with low volumes and/or converters in need to target specific applications.
- Machine replicates sealing performance of an industrial high-speed machine.
- Sealing and cooling jaws are interchangeable with those of high-speed SI-40 or SI-60 machine.

## SI-40 – Spout Inserting Machine

This machine comes with the automatic upload of the spout into the pouch.

### Advantages

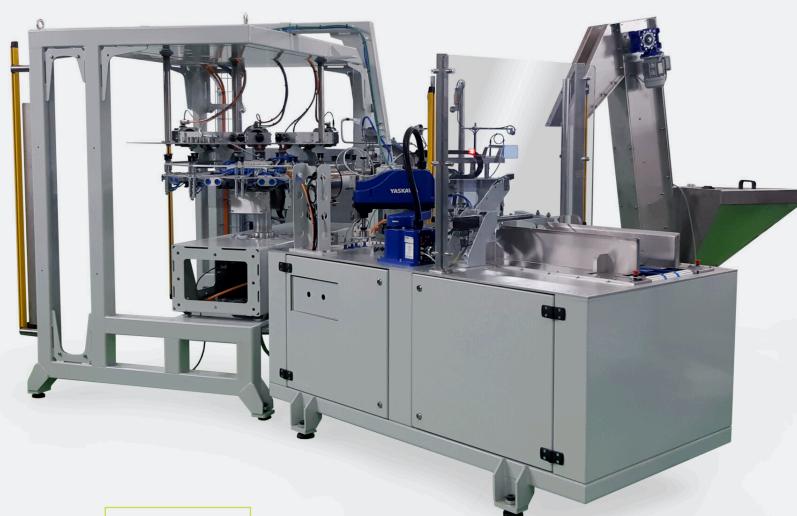

- Flexible, by concept this machine is modular. You can rebuild from one function to another
- Short change over time to go from one product to another one.
- Small footprint
- High speed (up to 40 p/min)
- Track and trace ready

## SI-60 – Spout Inserting machine

SI-60 is a servo driven, fully automatic spout inserting machine fitted for larger production plants.

### Advantages

- Top, off center and corner spouts.
- A wide range of pouch sizes (width 65 – 320 mm and length – 90 – 400 mm)
- A wide range of film thickness from 80 to 1.200 µm
- Change over time < 30 minutes.
- Robot loading and unloading
- High speed (up to 60-80 ppm)
- Outfeed on belt or rail system.
- Sorting bowl to handle many different types of spouts on the same feeding system.

# Our Solutions

While other companies supply and develop the machinery as well as the printed packaging material to their clients, Scaldopack has a completely different approach to the market. The machinery from Scaldopack is tailored to an earlier chosen pouch, spout and cap the customer wants to use.

## Solutions for

- High quality pouch filling
- Industry standard pouch spout inserting & sealing
- Tailor made solutions
- Easy-to-use control

## Personal care products

Your company is active in personal care products, and you are searching to find the right partner who builds your pouch filling equipment?

## Fruit juices & beverages

Such as pineapple juice, apple juice, lemonade or anything similar.

## Homecare products

Do you fill pouches with laundry detergents, dishwashing detergents, different sorts of liquid cleaners or liquid soaps?

## Chemical and technical products

Are you producing chemicals & technical products and seeking to find the right partner to build your machinery for your spouted pouches?

## High-viscosity foods and sauces

Such as honey, tomatofood, peanut butter, or sauces like ketchup or mayonaise.

## Alcoholic drinks

Such as wine, whisky, cocktails, liquor...

Scaldopack embraces ecological production in both in low energy consumption\* and as being one of the first in the industry to be able to seal mono layer films.

\*Our machines consume only 1/4th energy of comparable machines per pouch due to mainly servo motion.
